CIBES AIR®

Cibes

SPACE-SAVING HOME LIFTS

One of the great advantages of our home lifts is their efficient use of space. The passenger platform constitutes almost 70% of the total footprint, while the compact construction makes it possible to fit the lift into very narrow spaces.

Shaft and doors in Oxide 3, platform front panel in Oxide 3, platform back panel in grey wool, handrail and top bar in natural, anodized aluminum, safety floor Forbo Surestep Material Quartz Stone.

THINGS TO CONSIDER WHEN BUYING A LIFT

A lift for your lifestyle

When you decide to buy a home lift, it is important to consider how you want to use the lift in your everyday life. Do you need a lift for just one person or for several people? Does the lift need to accommodate a wheelchair, or will it only be used for comfort?

Minimal renovation

Regardless if you live in a house, duplex apartment, or a townhouse, the Cibes Air home lift is a great choice, thanks to its modular, space-saving construction. The Cibes Air comes with a ready-made lift shaft and requires no extensive remodel.

Finding the right place

The compact construction and great choice of sizes allows the Cibes Air to integrate seamlessly into most homes. This home lift fits into incredibly tight spaces, like the small and unused corners of your house or the void at the center of your staircase.

Keep your family safe

You should always make sure that the lift you decide to buy complies with safety regulations.

Create your custom design

Make the most of your opportunity to transform your lift into a beautiful architectural feature. The Cibes Air offers you the freedom to combine colors and materials to create a design which blends in perfectly with the decorative style and architecture of your home.

Sustainable technology

Cibes takes environmental responsibility from sourcing to recycling. The Cibes Air has a lifetime of 25 years and is recyclable to 91%.

Sound level & comfort

The EcoSilent drive system makes your lift travel so smoothly and quietly that it blends in completely with the sounds of your everyday life. This ingenious drive system is a must-have, if you want to offer yourself and your family a superior level of comfort.

WONDERFUL WOOD

Wood has been used by mankind since the beginning of time and has an almost magical ability to make us feel at home. Wooden materials infuse the room with natural harmony and few things are as soothing to the mind and soul.

FABRICS OF NATURE

Natural fibers like linen and wool never go out of style, but only you can decide what is right for your home. The elegant structure of linen adds cool sophistication to the room, while the rich texture of wool has a warm and welcoming feel.

MAGNIFICENT METAL

Hard-wearing metals like steel and aluminum exude a timeless elegance. The clean lines, smooth texture and great choice of colors enable these classic materials to blend in seamlessly with a wide range of decorative styles, whether minimalist, eclectic or traditional.

CIBES AIR®

While conventional lifts take weeks to install and require major construction work, the Cibes Air can be installed within days and requires only minimal remodeling. Our secret is our space-saving, modular concept, which reduces the structural impact on your home and minimizes the interruption of your daily life.

Modular lift shaft

No need for a masonry shaft, a ready-made lift shaft of glass or steel panels is always included.

Screw-driven system

Reliable 100% electric screw-driven system, no hydraulics.

Machine room-less

The machinery fits inside the shaft, no need for a separate machine room.

Customizable platform design

The platform is available in a wide range of materials and colors.

Reduced top height

The top height fits easily under most ceilings.

Energy-saving LED technology

The ceiling and platform are illuminated by durable and energy-saving LED lights.

Reduced lift pit

The lift can be installed with no pit or with a shallow pit of only 2 to 2 ¾"*

“The focus on sustainability matters is increasing in all parts of society. I really welcome this. The world needs to change in order to secure a solid economic, social and environmental development.”

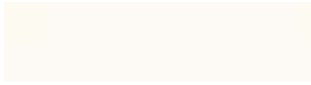

Per Lidström, CEO of Cibes Lift Group

*2 ¾" required if lift floor has tiles/laminate

ECOSILENT DRIVE

A QUIET REVOLUTION

The EcoSilent drive system makes lift operation blend in with the sounds of everyday life.

- Running the tap: 85 dB
- Dishwasher: 55 dB
- Outside lift with EcoSilent: 40 dB

GREEN TECHNOLOGY

The EcoSilent drive system reduces the energy consumption of your lift by 45%, compared to other screw-driven lifts.

- Energy consumption of 215 kWh/year
- Less than a modern washing machine

DRIVE UNIT

To ensure quiet and energy-efficient operation, the EcoSilent drive unit has a special motor, as well as adapted transmission and brakes.

LIFTING SCREW

The lifting screw has a 3 times higher pitch and even screw joints for smooth, comfortable and virtually soundless travel.

ROLLER GUIDE SHOES

Unique roller guide shoes act as interface between the guides and the platform. The roller guide shoes reduce friction by 90%.

SOUND INSULATION

The drive unit is enclosed in an elegant, sound reducing metal casing, designed to reduce noise and cover the drive unit.

OPTIONS & ACCESSORIES

Concealed automatic door openers

If you value your comfort, our automatic door openers are a great option. Our door openers are fitted inside the door frame and completely invisible.

Locking solutions

As an option, the call buttons can be equipped with different locking solutions.

Key lock

Code lock

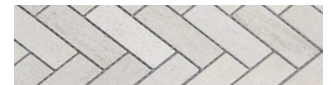

Call button with RFID tag reader

Customized flooring

Do you want the lift floor to match the floors of your house? Or do you just want something different than the PVC floors we offer? With the Cibes Air, you can select your own tiles or laminate floor.

Remote call buttons

The remote call buttons are mounted on a wall or post close to the lift to facilitate access for wheelchair users. The concept is available with a classic call button or with an elbow button (wireless).

CIBES LIFT GROUP

BRINGING PEOPLE TOGETHER

Founded in 1947, Cibes Lift Group is a world-leading manufacturer of space-saving, modular lifts. High-quality Swedish engineering and great Scandinavian design are the secrets behind our success. All lifts are manufactured in our factory in Sweden and exported to more than 70 countries.
